Event Schedule

Worker heat assignment to last 75 minutes. After 75 minutes, workers / drivers swap roles until we hit our designated run total per driver. You will hear last run from starter or timing scoring, that means your runs for that session are complete. Proceed to check in for your work assignment, put on a safety vest and find your work assignment. Get to your work assignment safely and send on person back to get their car to grid. FASTER we swap workers and drivers, the more time we have for… RACING.

Autocross   /   Test & Tune   /   Schools
